About The Diploma

An educational initiative of the Australasian College of Cosmetic Surgery designed for doctors working to enhance their skills specifically in cosmetic medicine.

The aim of this course is to develop and refine awareness of the particular requirements of cosmetic medicine. The course should enable a doctor to practice in the area of cosmetic medicine with more understanding and appreciation of the requirements. It should also give doctors the requisite knowledge and understanding to counsel potential patients and impart a proper understanding of procedures and realistic expectations of outcomes.

Candidates must have completed a minimum of five years post graduate College accredited medical experience and are required to be medically competent prior to entry to the training program.

Positions are limited and will be awarded on the merits of the applicants.

Application forms should be accompanied by a covering letter, a full CV and recent work history.

This program comprises the following;

- Compulsory workshops
- Attendance at accredited conferences and meetings
- Ongoing mentorship
- Private study
- Completion of set exercises
- Maintenance of Log Books of practice activity
- Participation in an approved body of research

The course requirements can be achieved over two years. Any extension of time will only be granted in exceptional circumstances as approved by the ACCS Council.

This diploma does not determine expertise as a clinician or counsellor but recognizes the satisfactory completion of the designated curriculum.
