### MEDIA RELEASE

#### College publishes BIA-ALCL update in Aesthetic Plastic Surgery

In 2018, Mr Patrick Tansley, current ACCS President and Dr Daniel Fleming, Chair of the BIA-ALCL Safety Committee, published a paper on BIA-ALCL in the journal Aesthetic Plastic Surgery (the Journal). In early 2020 they were advised by the journal that it had become '*...one of the most highly referenced articles in the journal's history...*' Since 1976, the Journal has been affiliated with the International Society of Aesthetic Plastic Surgery (ISAPS).

To mark the 50th Anniversary of ISAPS, Aesthetic Plastic Surgery published a special anniversary issue in August 2020, republishing a selection of its most highly cited and downloaded articles, including Mr Tansley and Dr Fleming's original article.

To accompany its republication, they were invited to write an update to their thoughts. This has now been published and can be accessed by the following link <https://rdcu.be/b56xk>
