Please make cheques payable to ASMS:

post to : Dr John McHugh, Secretary
1 Warwick Street
PENRITH NSW 2750

For further information please phone
Natalie on (02) 4721 8838

*A separate 2 day
Microvascular anastomosis
course will be held in May
2008.*

*Only those delegates who
have undertaken the Flap &
Facial Nerve workshop will
be permitted to enrol in the
Microvascular workshop.*

FLAP & FACIAL NERVE WORKSHOP 2008

**ASMS
ANZAOMS
& ACCS
present:**

**Flap & Facial Nerve
Workshop 2008**

2nd & 3rd February 2008

Venue: The University of Sydney,
Anatomy Department,
Medical School, City Road,
Darlington.

About the workshop:

The ASMS ran a very successful microvascular and flap course at the University of Sydney in September 2006. The course was attended by approximately fifteen delegates as numbers were restricted due to the availability of cadavers.

The first session entailed lectures by Dr Fiona Stewart (senior lecturer in anatomy at the University of Sydney) on the anatomy of the forearm and the chest wall. The lectures were informative and entertaining. It is noteworthy that anatomy teaching is progressively being phased out of undergraduate degrees. Certainly most of the delegates on the Course had fortuitously undertaken anatomical dissection in their primary university degrees. The second session was undertaken in the Anatomy lab where cadaveric specimens were utilised to raise pectoralis major flaps and radial forearm flaps. Simultaneously another session was run at the animal laboratory at Royal Prince Alfred Hospital where live microvascular surgery was demonstrated and practised.

We are now seeking applications for a further Flap & Facial Nerve Workshop which the ASMS in conjunction with ANZAOMS and ACCS are presenting which will be held at The University of Sydney on the 2nd and 3rd February 2008. Numbers are limited so please advise the secretary of your intentions ASAP.

Dr Darryl Hodgkinson and Dr Bill Pouw have very kindly agreed to demonstrate surgical techniques.

There will be opportunities for ACCS attendees to participate in hands on dissection. ACCS registrants are very welcome to observe the flap procedures as well offered by the ASMS. As you know Peter Vickers as well as Dr McHugh are members of ACCS also and we look forward to a constructive and mutually beneficial workshop.

Dr Ninian Peckitt Oral and Maxillofacial Surgeon is also attending to demonstrate engineering assisted methods for facial reconstruction. He also has extensive cosmetic experience.

Aims of the workshop:

A. Understanding the anatomy of the following flaps:

1. Pectoralis Major Myocutaneous (Pedicled)
2. Delto-Pectoral (Pedicled)
3. Temporo-Parietal Osteo-Fascial (Pedicled)
4. Radial Forearm (Free)
5. Fibula (Free)
6. Antero-lateral thigh (Free)

B. Understanding the practicalities of raising, inserting and fixating the flaps to the host tissue.

- Particular emphasis on the personalised nature of each flap and its suitability.
- Demonstration of the osteotomising of the fibula and application of reconstruction plates.

C. Surgical anatomy

- Facial Nerve and SMAS. Approaches to Cervico-facial rhytidectomy and parotid gland surgery. Endoscopic technique demonstrated.
- Levators and depressors of the face. Blepharoplasty and forehead implications.

Lectures and Cadaveric dissection to be conducted in sequence.

Cost \$2500 inclusive lunches and course dinner (sponsored)

Or \$1500 accredited registrar course fee

Date: February 2nd and 3rd 2008 (full day)

Sydney University

Speakers include:

H.Stone

P.Vickers

D.Hodgkinson

B.Pouw

N.Peckitt

For further information please contact Natalie at Dr McHugh's office on (02) 4721 8838.

To register please fill out registration form on back page of brochure, and send along with cheque payment to ASMS Secretary.
